

**WELCOME
TO
BIT META COIN**

How Crypto currency Industry Started By Satoshi Nakamoto

Bitcoin was made in 2009 .Satoshi Nakamoto created bitcoin Bitcoin was that when one person transacts with another person there shouldn't be involvement of any third party. A third party can be the owner of that currency ,third party could be a company or board of directors / Banks insurance companies nbfc companies or the government of any country. If these are not involved then it is called decentralized currency which does not have any centralized Authority.

Bitcoin is decentralised , public is the owner .People all over the world whoever uses the internet can own it because it is a virtual currency itworksonthe internet ,Bitcoinwasmade based onthisprotocolthat itshould be owned by the public.There should not be one owner of it so today even after 14 years Bitcoin is still running on the same principle.

No owner

No Company

No Organization

No Govt

Bitcoin

50-80 Crore users

In 2009= 1 cent

In 2025 = \$115000

After success of Bitcoin many new players came into this industry in which there are

What we learnt:

Over the last 14 years, people around the world who have purchased Bitcoin and held it for 5 years have earned huge returns on their investment and are all highly satisfied. Because ownership of bitcoin is completely public. After 14 years Bitcoin has a rate of \$30000 today .If you buy Bitcoin today then most likely in the next two years your money can be 10x 10 times industry experts believe that it can cross \$3 lakh to \$ 5 lakh

INTRODUCTION

What is **Bit Meta Coin** Blockchain?

- Bit Meta Coinblockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.
- A Bit Meta Coinblockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the Bit Meta Coin.
- Bit Meta Coinblockchain is a type of DLT in which transactions are recorded with an immutable cryptographic signature called a hash.

INTRODUCTION

Type of Blockchain?

PUBLIC BLOCKCHAIN

It is a permission less distributed Ledger on which anybody can join and conduct transaction...

PRIVATE BLOCKCHAIN

A blockchain network operates In a private context , such as a Restricted network , or is controlled by a single identify...

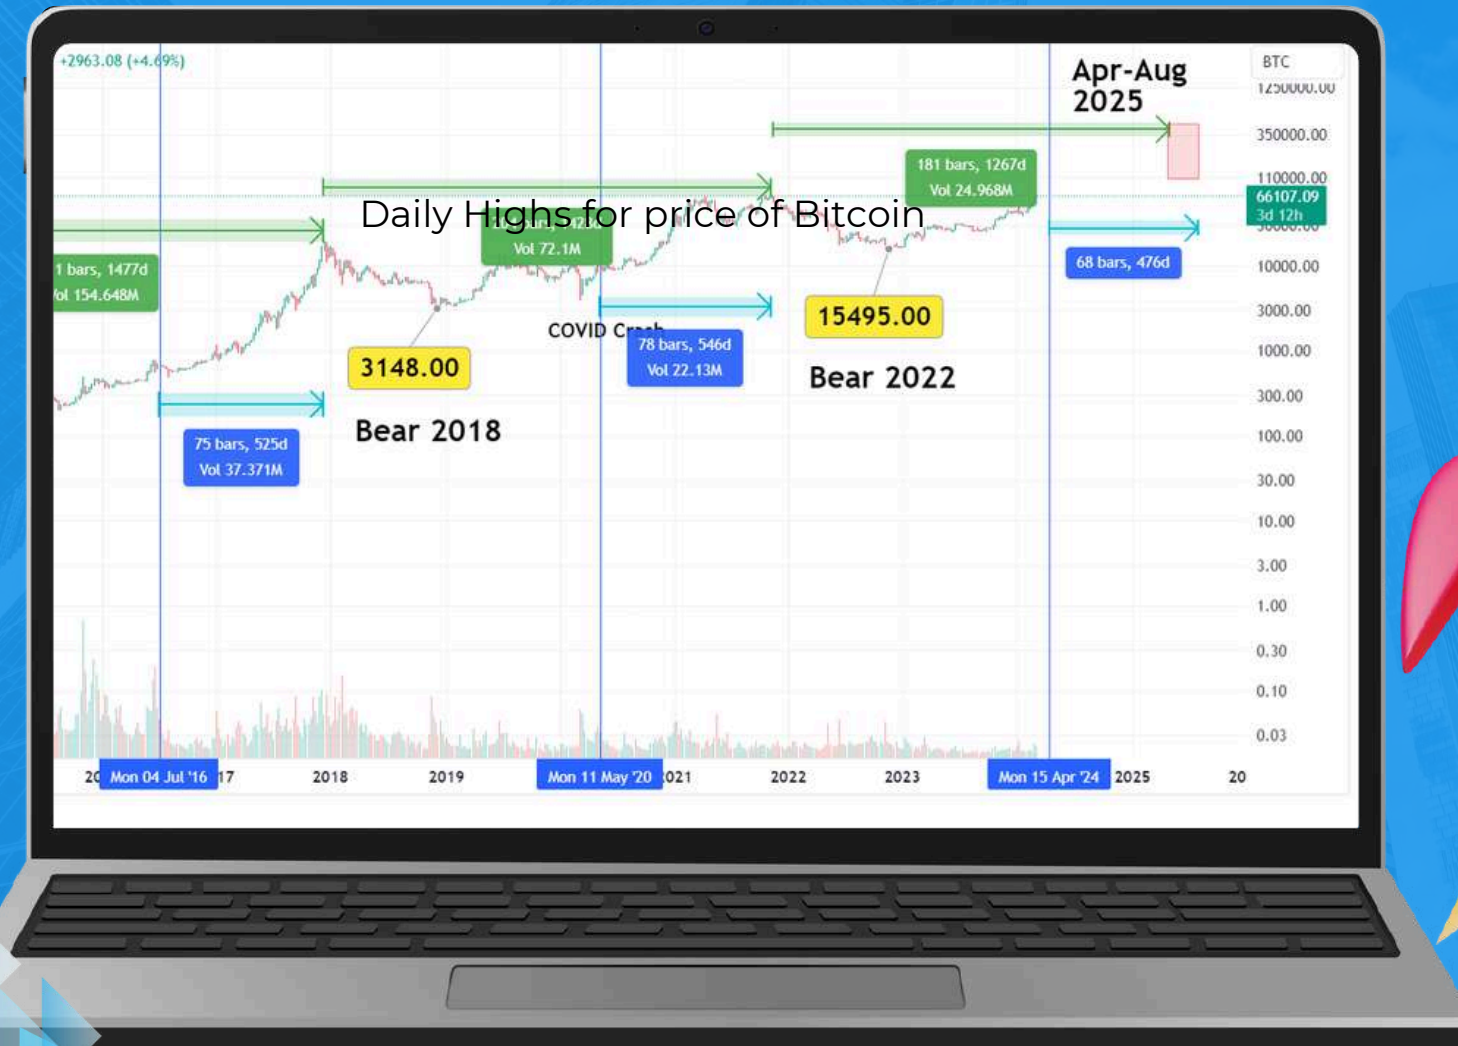

HYBRID BLOCKCHAIN

This blockchain is controlled by a single corporation, it is the combination of public-private and public-permissioned blockchains, allowing organizations to build private, permission-based systems in parallel with public, permissionless system

Market Analysis

Key Cryptocurrency Statistics

The global crypto market cap is \$1.06 trillion as of August 1, 2022. Approximately \$112 billion is traded in cryptocurrency per day. 65% of cryptocurrency users are bitcoin owners. \$22 invested in Bitcoin in 2012 would be \$1 million today. The top 10 cryptocurrencies make up 88% of the total market value. There are more than 6,000 different types of cryptocurrency. Bitcoin is posted about on social media every 3 seconds. The Level blockchain market will reach \$23.3 billion by 2023. India has more cryptocurrency holders than any other country -more than 100 million.

Bitcoin had a market capitalization of \$1,072.21 billion as of February 21st, 2021. 18,000 businesses are already accepting cryptocurrency payments.

What is **Wallet**?

CENTRALIZED

DECENTRALIZED

CENTRALIZED

- Control your funds
- Not Anonymous
- Hack and money stolen
- Server downtime
- Easy adoption

DECENTRALIZED

- You control funds
- Anonymous
- No hack
- Server Online 24/7
- Not easy adoption
- I.e. Token Pocket , Trust Wallet, Meta mask

What is Exchange?

An exchange, bourse, trading exchange or trading venue is organized market tradable securities, commodities, foreign exchange, future, and options contracts are bought and sold.

CENTRALIZED

DECENTRALIZED

CENTRALIZED

- Exchange Controls Funds.
- Not Anonymous
- Hacks & Server Downtime
- I.e. Binance, Wazirx

DECENTRALIZED

- You control funds
- Anonymous
- No hack & Server Downtime
- I.e. Pancake Swap, Uni Swap

Community and importance of community in cryptocurrency industry

Cryptocurrencies and wider blockchain projects are founded upon egalitarian principles that ensure that no single individual or corporation can take full control. Even the etymology of the word "ecosystem" -often used to describe the network of infrastructure, products, workers and supporters that makeup a project -is related to ideas of interconnectedness and symbiosis. More so than in most industries, blockchain communities offer unique input into how projects develop, communicate and operate, often shaping the technology of the companies that they stand behind. As such, projects across the world are pouring millions of dollars and serious manpower into sustaining and developing their valuable communities. A hongstfierce competition, they recognize that they cannot survive and thrive without communities.

Recognizing these benefits, many projects run a host of rewards programs and development initiatives for their communities, allowing them to earn incentives or prizes for engagement on build community. These are important exercises to ensure their communities feel valued and engaged. The relationship needs to be mutually beneficial and, more importantly, founded on open honest and transparent communication.

The community is the heart and soul of a blockchain project, providing a strong foundation that drastically improves the likelihood of a project's success. The individuals who are part of community help raise funds, create videos, and show other people how to use features of the technology. Community members often are the people who organize meetups, answer questions in person and on social media platforms or amplify content on Crypto Twitter. Community members might contribute open-source code, build apps using the core technology, or evangelize the project.

The strength of a community's network effect, moreover, is not only determined by how many people make up the community, but the bond between participants and value of their interactions. The decentralized nature of blockchain ensures no single entity or individual is in control of a project. Instead , a community of diverse individuals is in the driver's seat, working to propel and working for people. the future of any blockchain idependent upon the promise that engaged and talented developers maintain the network. Blockchain communities are the face of the ecosystem, explaining to the world why people should be using a particular chain and its value to the world.

An American football team has 11 players. The "12th man" refers to the team's supporters, suggesting that the fans have a role in encouraging or motivating their team to win. Members of a blockchain project don't merely support the team but have a spot on the team. Communities have financed projects, crowdsourced ideas that turned into product updates, and developed long-term relationships that bring a project to life. A project is its community and vice versa. If concepts, products, entities, spanning all industries, not just within the blockchain space, intend to truly have an impact, they should consider building a supportive community. For a project to flourish and grow, its community must be engaged and encouraged to meet, share ideas, and build. There are many ways for a project to encourage participation. As one example, internship programs offer younger members of a community hands-on learning experience. A good task for a green intern is to help spread awareness about a project. For a project to flourish and grow, its community must be engaged and encouraged to meet, share ideas, and build. There are many ways for a project to encourage participation. As one example, internship programs offer younger members of a community hands-on learning experience. A good task for a green intern is to help spread awareness about a project. The best aspect of crypto communities is that most have low/no barriers of entry and provide a clear path for anyone to get involved and gain experience. Because of blockchain technology, these projects have become like startups that can crowdsource funding. It is capitalism & free markets in their purest forms, without governmental red tape, regulation, and restrictions. This new system is what makes it possible for projects to reach fulfill their potential. Crypto communities are also pushing the evolution of organizations further as people are experimenting with different organizational models and governance structures. The industry is accelerating innovation in many ways, not just in terms of technology. Today big companies put all their resources and research in 'intrapreneurs' and try to create an environment of innovation. Big companies should instead look at how innovation is being done in the blockchain space, where people come together spontaneously to solve complex problems together and build businesses of the future. In this way, crypto communities aren't just important to the crypto industry. They are also starting to influence how the entire world operates, creating a model for how diverse voices can turn new, innovative ideas into tangible outcomes which benefit everyone

ABOUT US

Bit Meta Coin

“ByThe Community For The Community”

Bit Meta Coinblockchain will benext generationblockchain distribute database or ledger that is shared among the nodes of a computer network. As a database, Bit Meta Coinblockchain will stores information electronically in digital format. Bit Meta CoinBlockchain will be the best blockchain for their future role in cryptocurrency systems, such as Bitcoin, for maintaining a secure and decentralized record of transactions.

ABOUT US

Bit Meta Coin

- No scam/cheating
- Non editable incentive program
- Good earning in 3-5 years
- Transaction per second = 10000 Creates one block every 3 seconds, One of the fastest blockchain in the world.
- No lies/cheating

ABOUT US

Bit Meta Coin

TOTAL SUPPLY OF BIT META COIN | 11 MILLION

1ST PHASE | 2 MILLION | MARKETING RATE 0.50\$

2ND PHASE | 2 MILLION + 2 MILLION | MARKETING RATE 5\$

3RD PHASE | 3 MILLION + 4 MILLION | MARKETING RATE 50\$

4TH PHASE | 2.5 MILLION + 7 MILLION | MARKETING RATE 500\$

5TH PHASE | 1 MILLION + 9.5 MILLION | MARKETING RATE 5000\$

SELL COINS | COMPANY 50% | CUSTOMER 50%

0.5 Million Coin Resevers For Developer & Blockchain Maintenance fee
